VacciCheck Titer Testing Flow Chart for Animal Shelters
 For Core Vaccine canine parvovirus, distemper virus and feline panleukopenia
 VacciCheck in house core vaccine titer testing can rapidly and cheaply test populations in order to identify animals that are protected or susceptible has allowed many animals to live that might otherwise have been euthanized as they were of unknown status.

*(FPV is also a consideration, but poor test sensitivity is limiting)

**in shelter isolation area, foster home, or other off-site facility (2 weeks CPV, 6 weeks CDV) and perform diagnostic testing if possible
